

Automate Progress Tracking From Your Site Capture

Progress Tracking. Automated. Simplified.

Advanced Tools for Comprehensive Progress Tracking

ProgressTrack by Track3D transforms the way construction teams monitor progress, providing a complete and comprehensive overview of your project's progress. Utilizing advanced AI and machine learning, Track3D automates the tracking of detailed job activities and elements.

Key Capabilities of ProgressTrack

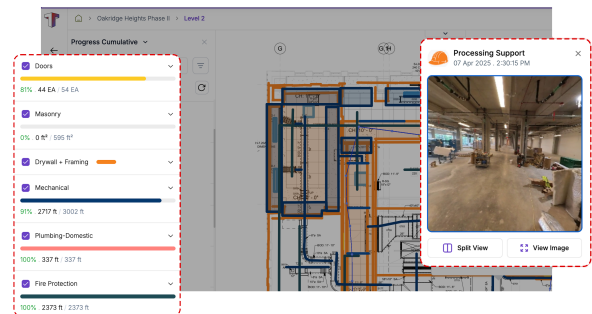

Progress Overview

Get a summary of overall progress across different project levels and elements, all in one clear view.

Level	Latest Progress	Top Track (%)	Rebar Trace (%)	Forming (%)	Insulation (%)	Dry Wall Hanging (%)	Topo & Heat (%)
Level 1 Steel	Jul 06 2025	88%	88%	80%	89%	86%	89%
Level 2 Steel	Aug 02 2025	100%	100%	100%	100%	100%	100%
Level 3 Steel	Jul 07 2025	90%	90%	100%	90%	90%	90%
Level 4 Steel	Jul 06 2025	99%	99%	99%	99%	99%	99%
Level 5 Steel	Aug 02 2025	100%	100%	100%	100%	100%	100%
Level 6 Steel	Jul 05 2025	100%	100%	100%	100%	100%	100%
Level 7 Steel	May 02 2025	0%	0%	0%	0%	0%	0%

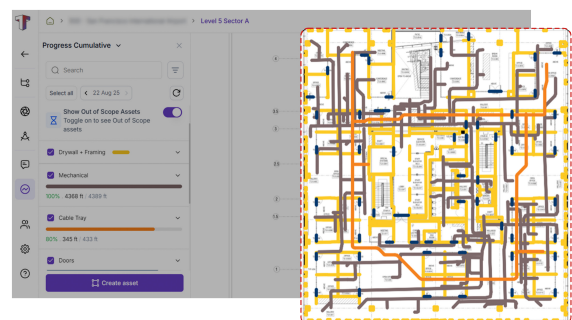

Production Tracking

Use trend charts to monitor and compare progress across various trade partners, gaining insights into productivity levels.

Visual Progress Maps

See your progress painted on the project's latest shop drawings, with a clear quantification of work installed, offering a visual representation that's easy to understand and act upon.

Benefits

10-15%

Time Saved

Leverage production analytics, automated reports and time stamped data for better coordination of tasks.

15%

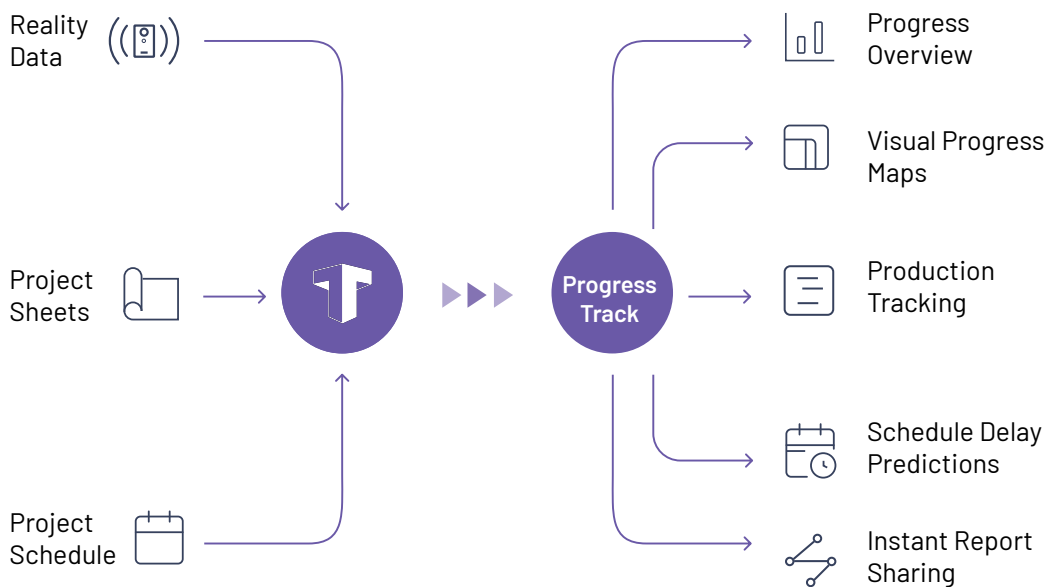

Time Saving in Coordination

Streamline coordination with project stakeholders, significantly cutting down on time wasted coordinating project status.

12%

Improvement in Schedule Adherence

Stay on track with early delay alerts that help manage schedules proactively, improving overall project schedule adherence.

Track3D has consolidated what used to be scattered across five different platforms into one seamless interface. Now I can manage everything from checking conditions, tracking progress, to reporting—all in one place.
